

Understanding the Changes to the DSM-V

The Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-V), published in May 2013, marks the first significant revision of the publication since the DSM-IV in 1994. Changes were largely informed by advancements in neuroscience, clinical and public health need, and identified problems with the classification system and criteria put forth previously. Much of the decision-making was also driven by a desire to ensure better alignment with the International Classification of Diseases and its 11th edition (ICD-11). Come learn how the changes impact daily practice as well as discuss challenges with colleagues.

9:00 a.m. ~ 12:00 p.m.

3 Category I CEUs

Certificate received same day!

\$35 only!

FREE Parking!
